## **Abstract**

Teaching Origami is challenging. Especially when it comes to teaching “How to read and fold from origami diagrams” to new learners. To fold a model from a diagram one should pay a very close attention to arrows, fold lines, symbols, changes of the model along the folding process, Texts in each step and etc. Learning to read and fold origami models from diagrams often requires practices that learners sometime skip or postpone because they use o

In this paper I discuss a gamifying method “Diagram Puzzles”, that increases the engagement of the students and helps them to learn origami diagrams.
